ABOUT ME

I am a Software Engineer passionate about building robust, scalable, and user-focused solutions. With full stack expertise and a strong grasp of software architecture, I deliver high-quality applications and solve complex problems. I thrive in collaborative environments, write clean, maintainable code, and aim to drive innovation through technology.

WORK EXPERIENCE

General Directorate of Archives Tirana, Albania

Head of Digitization Sector & Full Stack Developer

14/08/2024 – Current

- Planned, coordinated, and oversaw all digitization initiatives, ensuring alignment with sector objectives, regulatory requirements, and institutional standards.
- Managed team operations, including task distribution, performance oversight, and support for resolving challenges, fostering an efficient and collaborative work environment.
- Directed end-to-end document digitization workflows, ensuring accuracy, efficiency, and secure handling of records.
- Designed and implemented end-to-end full-stack applications, managing databases, backend services, and server infrastructure to ensure robust, high-performance solutions.
- Built and optimized interactive web interfaces and integrated systems, aligning technical development with organizational goals and enhancing overall user experience.

Awebrie

Frontend Developer

15/09/2023 – 31/07/2024

- Collaborate with designers to develop user-facing features while maintaining brand consistency and design integrity.
- Ensure cross-browser compatibility and optimize applications for performance, speed, and scalability.
- Implement responsive designs to provide seamless user experiences across devices and screen sizes.
- Write clean, maintainable, and reusable code, and conduct code reviews to uphold coding standards and best practices.

Embedded Systems Design & Production Tirana, Albania

IT Support Specialist

01/09/2021 – 30/08/2023

- Review diagnostics and assess the functionality and efficiency of softwares.
- Helpdesk-based phone IT support for end users, including server troubleshooting support and customer service.
- Set up new user accounts and profiles and address password issues.
- Diagnos and find suitable solutions to various technical hardware and software problems.
- Maintain customer satisfaction by using good communication, empathy and listening skills.
